

Clean Up Day

Hi, I'm Carla. I'm thirteen years old. I'm a junior high school student. There are twenty students in my class. On Mondays we always study, but today we did not study. Why? Today was Clean Up Day. We cleaned up a river. The river is next to our school.

This morning we went to the river. It was not clean. It was dirty. There were many old plastic bottles. There were some white plastic bags. My mate found a big rubber tire. It was under a bridge. Now the river is clean. We are happy. I think the river is happy too. Clean Up Day is cool!

Answer these questions.

1. How many students are there in Carla's class?

2. Was today Clean Up Day?
